

# TSA Information for Aviation Science

October 14, 2019

SAC Prefix and Name: **AVS – Aviation Science**

Name of faculty member responsible for TSA reporting: **Larry Altree**

**Description of TSA(s) in 300 words or less:** Our students take a series of FAA written and practical tests as they progress through the program. Each degree option represents a specific set of these tests. The written tests are conducted in FAA testing centers. The practical tests are conducted by FAA Designated Pilot Examiners. Both of these are external PCC.

**Maximum score possible:** The written test has a maximum score of 100%. The practical tests are pass/fail.

**Benchmark score:** The written tests have a minimum passing score of 70%. Without passing the written test, the student is not eligible for the practical test. The practical tests are pass/fail.

**Clarifying notes:** We do not collect written test scores, but students cannot take the practical test without first passing the written with the minimum 70%. We can verify students have passed both written and practical tests by checking the FAA pilot database.

CIP Code	Test Name	Test Type
490102	FAA001 / 002	TESTIRCL
