

## TSA Information for Welding

October 14, 2019

SAC Prefix and Name: **WLD - Welding**

Name of faculty member responsible for TSA reporting: **Kevin Longueil**

**Description of TSA(s) in 300 words or less:**

**Maximum score possible:** Pass

**Benchmark score** (score that “meets expectations” for completing students): Pass

**Clarifying notes:** The test name is a locally developed code. The test type is a guided bend test, which is an industry standard performed in accordance with American Welding Society D1.1 Structural Steel Welding Code. The test is a pass/fail test. Students must pass root, cover, and guided bend inspection to the AWS standard. Students are not given a passing grade if they do not meet the standard.

I usually collect data in early summer after spring term has ended so I can include spring term results with the report.

CIP Code	Test Name	Test Type
480508	2AREG040	GuidedBend
