

Volcano Reading Guides

These reading guides will guide you as you explore OERs and web pages to learn about volcanoes. Each reading guide consists of three parts:

- 1) Guiding Questions to focus your reading. Preview these questions before you begin reading and then keep these questions in mind to focus your reading.
- 2) An annotated collection of OER and web resources on volcanoes. After reading this material you should be able to answer the guiding questions.
- 3) Summary questions to check your understanding after you have completed the reading.

The reading guides are pdf files which you can view in spaces or download.
