

Home - PACTEC Education Consortium

About Us

The purpose of PACTEC is to enhance the access of high school and PCC students to quality career and technical (vocational) education. This encompasses a broad scope ranging from career development and guidance programs to technical skill development instructional programs.

PACTEC is a consortium composed of all the K-12 school districts that are within the PCC district boundary, the College itself, and several other entities, whose common theme is career and technical education and workforce development.

What We Do

The primary focus of PACTEC is to improve student achievement of state standards and develop skills and behaviors to succeed in a career. PACTEC assists schools with support for professional technical education, school-to-work, professional development and connections with business and industry. Below is a few of our programs and activities.
