

# Math-in-CTE Professional Development Workshop

## Overview of Workshop

---

The Math-in-CTE Professional Development Workshop was a one year grant sponsored by the Oregon Department of Education which started in August 2010 and ended in May 2011 that included three workshops.

The workshops provided Career & Technical Education (CTE) high school teachers an opportunity to map out their CTE curriculum and identify embedded key math concepts. The CTE teacher teamed up with a Math teacher from their high school to develop a lesson plan to teach one or more of the math concepts that they had identified in their CTE curriculum. At the end of the final workshop teachers swapped lesson plans and practiced teaching the lessons to each other.
